

## Code Updates

### Summary

2023 Total	73,674
2024 Total	74,044

New Codes	395
Revised Titles	13
Deleted Codes	25

Majority of new codes in the following six chapters:

Chapter 6: Diseases of the nervous system	24
Chapter 7: Diseases of the eye and adnexa (H00-H59)	34
Chapter 13: Diseases of the musculoskeletal system and connective tissue (M00-M99)	36
Chapter 17: Congenital malformations, deformations and chromosomal abnormalities (Q00-Q99)	22
Chapter 20: External causes of morbidity (V00-Y99)	123
Chapter 21: Factors influencing health status and contact with health services (Z00-Z99)	30

## Guideline Updates:

FY 2024: I.C.1.d.5.b

### **(b) Sepsis due to a postprocedural infection**

For **sepsis** following a **postprocedural wound (surgical site) infection**, a code from T81.41 to T81.43, Infection following a procedure, or a code from O86.00 to O86.03, Infection of obstetric surgical wound, that identifies the site of the infection should be **sequenced** first, if known. Assign an additional code for sepsis following a procedure (T81.44) or sepsis following an obstetrical procedure (O86.04). Use an additional code to identify the infectious agent. If the patient has severe sepsis, the appropriate code from subcategory R65.2 should also be assigned with the additional code(s) for any acute organ dysfunction.

FY 2023: I.C.1.d.5.b

### ***(b) Sepsis due to a postprocedural infection***

*For infections following a procedure, a code from T81.40, to T81.43 Infection following a procedure, or a code from O86.00 to O86.03, Infection of obstetric surgical wound, that identifies the site of the infection should be coded first, if known.*

FY 2024: I.C.1.g.1.f

**(f) Screening for COVID-19**

**For screening for COVID-19, including preoperative testing, assign code Z11.52, Encounter for screening for COVID-19.**

FY 2023: I.C.1.g.1.f

**(f) Screening for COVID-19**

*During the COVID-19 pandemic, a screening code is generally not appropriate. Do not assign code Z11.52, Encounter for screening for COVID-19. For encounters for COVID-19 testing, including preoperative testing, code as exposure to COVID-19.*

I.C.9.a.12: **NEW** Guideline

**12) Hypertension, Resistant**

Resistant hypertension refers to blood pressure of a patient with hypertension that remains above goal in spite of the use of antihypertensive medications. Assign code I1A.0, Resistant

hypertension, as an additional code when apparent treatment resistant hypertension, treatment resistant hypertension, or true resistant hypertension is documented by the provider. A code for the specific type of existing hypertension is sequenced first, if known.

I.C.9.e.6: NEW Guideline

**6) Myocardial Infarction with Coronary Microvascular Dysfunction**

**Coronary microvascular dysfunction (CMD) is a condition that impacts the microvasculature by restricting microvascular flow and increasing microvascular resistance. Code I21.B, Myocardial infarction with coronary microvascular dysfunction, is assigned for myocardial infarction with coronary microvascular disease, myocardial infarction with coronary microvascular dysfunction, and myocardial infarction with non-obstructive coronary arteries (MINOCA) with microvascular disease.**

FY 2024: I.C.18.e

**e. Coma**

Code R40.20, Unspecified coma, **should** be assigned when the underlying cause of the coma is not known, or the cause is a traumatic brain injury and the coma scale is not documented in the medical record.

FY 2023: I.C.18.e

**a. Coma**

*Code R40.20, Unspecified coma, may be assigned in conjunction with codes for any medical condition.*

FY 2024: I.C.18.e.1

**1) Coma Scale**

The coma scale codes (R40.21- to R40.24-) can be used in conjunction with traumatic brain injury codes. These codes **cannot be used with code R40.2A, Nontraumatic coma due to underlying condition.** They are primarily for use by trauma registries, but they may be used in any setting where this information is collected. The coma scale codes should be sequenced after the diagnosis code(s).

FY 2023: I.C.18.e.1

**1. Coma Scale**

*The coma scale codes (R40.21- to R40.24-) can be used in conjunction with traumatic brain injury codes. These codes are primarily for use by trauma registries, but they may be used in any setting where this information is collected.*

FY 2024: I.C.21.c.8

The follow-up Z codes/categories:

Z08        Encounter for follow-up examination after completed treatment for malignant neoplasm

Z09        Encounter for follow-up examination after completed treatment for conditions other than malignant neoplasm

**Codes Z08, Encounter for follow-up examination after completed treatment for malignant neoplasm, and Z09, Encounter for follow up examination after completed treatment for conditions other than malignant neoplasm, may be assigned following any type of completed treatment modality (including both medical and surgical treatments).**
